

Please do nothing to lessen Indiana's Telephone Privacy Act. It has finally allowed me to have peace and quiet from the 2-5 calls daily that I once received from telemarketers. These calls are nothing but and invasion of one's privacy and we have the right to protection from these obnoxious interruptions that frequently come at dinner time...I have even had calls after 9PM at which time I am frequently in bed as I rise very early to prepare for work and I cannot turn my phone off(why should I have to)as I have an aged mother, so I must keep the lines of communication open. Again, please DO NOT interfere with the Indiana Telephone Privacy Act.
